The color selector is designed to assist you in making your selection for Cohills® Metal Essence Metallic epoxy colors. Metal Essence Metallic pigment packs are measured by weight (not volume) and are designed to be added to a variety of clear vehicles including, but not limited to 100% solids epoxy, polyaspartics and polyurethanes all creating different effects. Metal Essence Metallic pigment packs are packaged in two sizes, small and large. 1 large pigment pack is designed to be added to 1-1/2 gallon kit of 100% Solids Epoxy. The small pigment pack is 1/4 the size of the large and should be mixed accordingly. To ensure proper color, the entire contents of the Metal Essence Metallic pigment pack should be used. Be sure to thoroughly read all application data on whatever vehicle you are adding the Metal Essence Metallic pigment packs to. Mix thoroughly for 3 minutes to insure proper dispersion.

FOR USE IN:

- HOMES
- SALONS
- STORES
- OFFICES
- GARAGES
- RESTAURANTS
- SHOWROOMS
- COUNTERTOPS

Due to reproduction limitations, it is necessary that we reserve the right to allow for reasonable variations. Printed colors shown are the approximate color. Variations in application & coverage rates will also affect the final appearance. It is highly recommended that you do a sample test area before installation. An instructional DVD is available upon request.
